Prevalon® Pressure-Relieving Heel Protector

can have an immediate impact on your heel pressure ulcer prevention strategies by establishing a protocol for use on your non-

ambulatory patients. It can also help you meet CMS reimbursement mandates.

A study among ICU patients using Prevalon resulted in **100% prevention** of both heel ulcers and plantar flexion contracture as well as an annual revenue preservation of \$1.9 million!³

1. GHX Trend Report (Dollars), 3rd Quarter, 2008 Hospital. 2. Garrett D. Intervention with a new heel protection device and silver alginate dressing to prevent amputation of lower leg due to stage IV ulcer of the heel and malleolus, Salem Village Nursing and Rehabilitation Center, 2006. 3. Meyers T, et al., Successful prevention of heel pressure ulcers and foot drop in the high risk ventilation patient population. Poster presented at 3rd Congress of the World Union of Wound Healing Societies, Toronto, Canada, June 2008. 4. Sluser S. Consistency the key for treating severe perineal dermatitis due to incontinence, ASWC, 2005. 5. Wollmann, A. It's easy: preventing incontinence-associated dermatitis and early stage pressure injury, 3rd Congress of the World Union of Wound Healing Societies, 2008.

Comfort Shield® Barrier Cloths

provide all-in-one protection against Incontinence-Associated Dermatitis (IAD), a major risk factor for pressure

ulcers, while bringing protocol compliance to the bedside. Our Peri Check™ Guide on every package empowers non-licensed staff to observe and communicate IAD to the RN.

One facility saw a **77% reduction** in IAD with Comfort Shield Barrier Cloths.⁵
