

Happy Heels.

They're lucky. They were protected by the brand with the most proven outcomes.

Using Prevalon® Pressure-Relieving Heel Protector means you're providing your patients the most advanced heel ulcer protection available – and that's why it's the #1 hospital brand¹.

Prevalon completely floats the heel for total pressure relief, and it stays on the foot.

In fact, one facility using Prevalon saw zero pressure ulcers and a \$1.9 million revenue preservation.²

Fewer pressure ulcers. Better outcomes.
That's something everyone can be happy about.

For more clinical outcomes, a free financial analysis and additional heel ulcer prevention tools, just visit:
